Comments written on feedback forms at September Drop-In sessions	
With the suggested use by school for performances etc and with other events, I wonder if the car park is big enough. Parracombe & Kentisbury schools tend to combine for performances and sometimes Lynton as well. That would be a lot of cars needing somewhere to park. Also extra traffic using Church Lane and passing the school. Otherwise, I like the plans and think everything is presented very well.	Thank you for the hard work that has been done and for the consultation. My concern is the re-use of the stage boards and to use / re-purpose to a functional item (panelling?) to retain the character of the village hall and to acknowledge the importance of history. The plans are beneficial to all who use this valuable hall. It is brilliant that the school will benefit.
Plant room and toilet block need to be well sound proof. Traffic will be a big issue because there is about room for 20 cars in the car park, so people will just park anywhere.	I have concerns about the extra vehicles if the hall will increase its capacity. Where are they all going to park? The hall car park holds 19 vehicles which isn't big enough. I can't see the difference from when the railway put in plans for the turntable and people rejected it because of the parking. Surely there will be the same issue. The doors that lead into the field – why is that for people to walk onto private land. Noise from the hall would increase as previously mentioned a while ago from a party. I was told that the fire doors at our end would be kept shut, but if the main door is being moved, it would increase the noise from events and parties.
Please re-purpose the stage.	I would like to see the stage and any other materials which have to be removed possibly recycled into the new building.
I would like to see the stage wood used to commemorate in some way – within the new hall – recycled in fact.	Useful to have a "wet room" for the disabled toilet facility. I'm not sure disabled parking is in the right place. The fire exit / use of existing entrance lobby should be wheel chair friendly. Good luck and I will help where I can.
I'm concerned about the level of funds required but will fully support fundraising activities.	A fantastic opportunity to create a varied, well used space for a variety of individuals and groups.
What a great asset to the community this village hall will be. Would be great to get this project underway as this is what the village needs. I will back all fundraising to get this underway. You can clearly see that there has been a great deal of work, planning, and commitment from local residents who have	I have travelled to numerous village halls in Devon and beyond, and have never been to one in such desperate need of repair. Its dilapidated state is a result of decades of ownership by an organisation that didn't invest a penny in its fabric. The only investment it received was as a result of

been involved from the beginning. Fantastic to see. I hope this project gets underway and receives all the funding it deserves. Well done to everyone involved for a great presentation of the plans and a great energy behind the whole project.	village efforts. If the building does not receive attention now, I fear it will ultimately be closed to users on the grounds of it being irreparable. The sum needed sounds immense – and it is – but the loss of this amenity to the village would be of greater cost.
Please could there be one or two high back chairs, with arms, for the elderly/disabled.	Could we have an alternative meeting place during the renovation?
The proposed plans look excellent and seem to cover the range and needs of the village.	I feel very excited about the prospect of the proposed plans inclusive of the school.
Excited to learn more about the proposed changes. I fully support the proposals and can see how the village hall will be more useable, more environmentally sensitive, and a great place for children's parties, plays, yoga and more.	Clearly a lot of time and effort has been put into these proposals and the result will clearly benefit the community and beyond. Hopefully the community will embrace the proposals.
We tried to do our weekly line dancing classes in the hall, but it's too narrow and long. The main area needs to be squarer. As the hall is, when the tables are up and the chairs are out, it is very hard to get from the front of the hall to the back without moving people.	I congratulate the committee on getting the plans to this stage. They have produced a design which takes in the majority of comments from previous consultations and have come up with a building that works for all kind of events. One minor comment – whilst disabled toilets and parking look fine, please double-check measurements. From experience, you do need a good space to get out of the car and into a wheelchair – ditto the loos. Thanks everyone for a great job.
I'm excited at the prospect of a useable space for events such as "dungeons & dragons", board games events, and table top war games eg: Warhammer. I look forward to seeing how this progresses.	I see these proposals as an opportunity to see the village hall being capable of catering for use by many and varied groups of people. It will be a fantastic asset for the village.
It will be a great gathering place for the younger community.	Looks fabulous. It will make the teaching space a lot more luxurious.
Thank you so much for the hard work that has gone into this. It will be amazing.	I am excited how plans are progressing. The new village hall will be an amazing benefit to the Parracombe community.
Doing nothing is not an option.
